Kansas City, Missouri 64116

Re: Potential SARS-CoV-2 and resultant COVID-19 exposures

To whom it may concern:

Foundation Repair Kansas City – HBA has employed Compliance Professionals, Inc. to provide OSHA compliance services to ensure that all proper workplace controls are in effect for worker protection.

To this end all individuals entering your home have been properly trained in measures to protect themselves from airborne particulate hazards – primarily respirable Silica. An ancillary result from portions of this training, primarily personal hygiene and wearing of nitrile gloves and respiratory devices, conversely provide protection to the homeowner from any potential spread of human airborne viruses.

In this specific case, common colds, flu, and more recently, SARS and COVID-19 viruses are effectively prevented from interpersonal exchange by our personnel while in your home. Furthermore, no individual would be permitted to work while exhibiting any sort of airborne respiratory infection or illness.

You may rest assured that HBA subcontractors and/or their workers practice excellent personal hygiene and wear personal protective equipment at all times during the job. Verification of this is quite simple - merely observe that all employees are wearing protective gloves, filtering faceplates or cartridge respirators.

Should you have any questions or concerns, please contact Compliance Professionals management at 913-636-6303.

Most respectfully,

Robert J. Lockett

Robert J. Lockett
